Milk products that contain animal rennet have been labelled accordingly.
The source animals have never been fed with feeds produced from internal organs, blood meal and tissues of ruminant origin.
The milk has been processed to make it fit for human consumption.
The milk has been processed to a temperature, which ensures destruction of organisms causing tuberculosis, listeriosis, paratuberculosis, Q fever and brucellosis.
Australia is free of bovine brucellosis and bovine tuberculosis.
The animals from which the milk has been derived were not exposed to Bovine Growth Hormones (BGH) / Bovine Somatotropin Hormones (BST).
The source animals were not subjected to estrogenic treatment in last 90 days.
The milk does not contain drug/pesticides/heavy metal residues above the limits prescribed by the Codex Alimentarius Commission.
Milk/milk products do not contain preformed bacterial toxins such as those produced by bacteria belonging to Staph. aureus, Bacillus cereus, Clost. perfringens and Clost. botulinum and the level of mycotoxins is not above the limits prescribed by the Codex Alimentarius Commission.

I hereby certify that to the best of my knowledge the conditions or restrictions applicable under the particular inspection system prescribed in Regulations or Orders under the *Export Control Act 1982* have been complied with in respect of the prescribed goods described above, being goods that are:

1. In sound condition
2. Fit for human consumption
3. Of Australian Origin
